INTRODUCTION

In an organization such as the Arkansas Department of Health, it is, of course, impossible to acknowledge every one who plays a role in the development of a report of this nature. There are, however, several people and organizations who deserve special mention.

The Center for Health Statistics has primary reponsibility for the analysis of vital statistics data and for the preparation of Arkansas Vital Statistics: 1988. This report was prepared under the general supervision of Douglas R. Murray, Director. Werner Haney, Director of Vital Statistics Section, and Dorene Harris, Statistician designed most of the tables in this report. Joyce Eatmon, Research Analyst, did the computer programming and generated the tables. Additional typing services were provided by Kathy Shoemaker.

The Division of Vital Records (Henry Robinson, Jr., Director and State Registrar) is responsible for the collection and registration of all vital events. It is the data from these records which are the source of the information presented in this report.

The Division of Data Processing (Gerald Perkins, Director) provided the computer facilities for data entry and management.

The Demographic Research Division, Center for Research and Public Policy, University of Arkansas at Little Rock (Forrest H. Pollard and Lawrence Santi, Senior Researchers, and Mary A. McGehee, Research Technician and Programmer) provided the population data which enabled the calculation of many of the rates.

Through inter-state exchange agreements, most out-of-state occurrences of births, deaths, fetal deaths, and induced abortions are incorporated into this report. However, induced abortion data were not available from Texas and Louisiana for 1988, resulting in slight undercounts of the actual number of events.

Comments and questions should be addressed to:

DEFINITIONS

AGE - Age in years as of last birthday. For infants, age may be stated in days, weeks or months.

ANNULMENT - Legal invalidation or voiding of a marriage, which confers on the parties the status of never having been married to each other.

DEATH - Permanent disappearance of any evidence of life at any time after live birth.

DIVORCE - Final legal dissolution of a marriage.

FETAL DEATHS (MISCARRIAGES) - Termination of pregnancy through natural causes and without the aid of mechanical or medicinal agents, with the duration of pregnancy being less than 20 weeks gestation and/or weighing less than 500 grams. (This definition was effective with the 1983 events.)

FETAL DEATHS (STILLBIRTHS) - Death prior to the complete expulsion or extraction from its mother of a product of human conception, with 20 weeks or more gestation and/or weighing 500 grams or more; the death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. (This definition was effective with the 1983 events.)

INDUCED ABORTION (Induced termination of pregnancy) - Intentional termination of pregnancy with the intention other than to produce a liveborn infant or to remove a dead fetus.

INFANT DEATH - Death of an individual under one year of age.

LIVE BIRTH - Complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

LOW BIRTH WEIGHT BIRTH - Any liveborn infant whose birth weight is under 2500 grams (5 1/2 pounds).

MARRIAGE - Legal union of persons of opposite sex.

MATERNAL DEATH - Death attributable to delivery or the complications of pregnancy, childbirth or the puerperium.

NEONATAL DEATH - Death occurring to an individual less than 28 days of age.

OCCURRENCE, PLACE OF - Place (city, county or state) where the event occurred.

RACE - Recorded as the individual states on certificate for mother, father, decedent, couple being married or divorced. Race of live birth is determined by race of parents.

RESIDENCE, PLACE OF - Usual place of residence. For births and fetal deaths, usual place of residence of mother is used. Residence may be different than mailing address.

UNDERLYING CAUSE OF DEATH - Disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury. The cause of death codes used in this report are from the International Classification of Diseases, 9th Edition (ICD-9), as approved by the World Health Organization.

WEEKS GESTATION - The period of gestation (length of pregnancy) is the number of completed weeks elapsed between the first day of the last menstrual period and the date of delivery or termination.

1988 ARKANSAS VITAL STATISTICS: A REVIEW

BIRTHS

* There were 35,017 births to Arkansas residents in 1988.

  The Arkansas birth rate is 14.6, compared to a U.S. rate of 15.9.

  About one out of every five births (6,600) were to mothers 19 and under.

* More than one out of four births (9,263) were to unmarried women.

  Almost two thirds (5,399 out of 8,180) of the black, and over one seventh (3,828 out of 26,485) of the white births were to unmarried women.

  Fifty-six percent of the teenage births were to unmarried teenagers.

* There were 2,875 births weighing less than 2,500 grams or 5.5 lbs. (8.2 percent of the total).

  The percentage of low birth weight births for black was 13.2, compared to 6.7 for white.

* Birth defects were reported on the birth certificates of 448 (slightly more than 1%) newborns.

  Musculoskeletal defects were the most common, with 163 reported.

FETAL DEATHS AND ABORTIONS

Prior to 1981, some spontaneous abortions (miscarriages) were being reported on fetal death (stillbirth) certificates. During 1981, the reporting criteria for spontaneous abortions and fetal deaths were changed to comply with the new Vital Statistics Act of 1981. This Act required spontaneous fetal deaths of under 1,000 grams or 28 weeks gestation to be reported as spontaneous abortions. In 1983 the law was amended to require fetal death certificates for fetal deaths of 20 weeks gestation or weighing more than 500 grams. Spontaneous abortion and fetal death data for 1981-1983 are not directly comparable to data of previous years.

* Arkansas had 1,346 reported spontaneous abortions (miscarriages) and 295 fetal deaths (stillbirths).

  One-hundred sixteen stillbirths resulted from "Complications of the placenta, umbilical cord or membranes", which was the most common cause.

  The stillbirth rate (per thousand live births + stillbirths) was higher for black (14.1) than for white (6.6).

* There were 6,498 induced abortions to Arkansas residents this year.

  A total of 2,075 were to women 19 and under, 79 of whom were 14 and under.

INFANT DEATHS

- The Arkansas infant mortality rate was 10.7, while the U.S. rate was 9.9

  Black Arkansans had an infant mortality rate of 17.7, compared to a white rate of 8.7.

- Of the 375 Arkansans who died before their first birthday, over half (224) were less than 28 days old.

- "Congenital Anomalies" (birth defects) was the leading cause of infant deaths, claiming 87.

  "Sudden infant death syndrome" (SIDS) was second with 62 deaths, and "other respiratory conditions of the newborn" was third with 42 deaths.

DEATHS

- In 1988, 24,883 Arkansas residents died.

  The Arkansas death rate was 10.4, while the U.S. death rate was 8.8.

- The leading cause of death in Arkansas in 1988 was "heart disease", which took 8,617 lives.

  "Cancer", second, caused 5,416 deaths; "cerebrovascular disease" was third with 2,128 deaths.

- "Accidents", the fourth leading cause of death for Arkansans, took 1,241 lives.

  For ages 1 - 34, the leading cause of death was "accidents", accounting for nearly half of the deaths in this age group.

MARRIAGES AND DIVORCES

- There were 34,935 marriages performed and 16,747 divorces finalized in 1988.

  The Arkansas marriage rate was 14.6, compared to a U.S. rate of 9.7.

  The divorce rate was 7.0 for Arkansas and 4.8 for the U.S.

FOR EXPLANATION OF RATES AND RATIOS, SEE "FORMULAS" ON PAGE iii.
